Learning new languages

Listening audiobooks

STRENGTHS

Team work

Time management

Positive thinking

ABOUT ME

I am creative web developer who love to explore new technologies, learning new skills and meeting people. I enjoy creating interactive websites that run across the internet.

PROJECTS

Portfolio website

A highly interactive single page website built using HTML, CSS, JAVASCRIPT. The website has smooth page transition effect while opening navigation menu.

E-commerce website

A highly responsive e-commerce website built using MERN stack. In this, react is use to make front-end part of the website. Also, NPM packages are used.

Landing page

I created a beautiful landing page for locally based clothing brand.

Web app using api

Created food recipes app using React JS in this project api is used to get recipes of any food.

EDUCATION

KIT'S College of Engineering, Kolhapur

Bachelor of Engineering in Electronics and Telecommunication

New College, Kolhapur

Higher secondary board
